About Me

I have a strong background in web development, utilizing HTML, CSS, JavaScript, and modern frameworks like Bootstrap 5, jQuery, and Ajax to build responsive and dynamic user interfaces. On the back end, I specialize in PHP and Laravel (versions 8 to 11), creating scalable applications with seamless MySQL database management and migration. I'm also proficient in developing RESTful APIs to enhance system functionality and interoperability. Security is a priority in my development process, ensuring applications are resilient against vulnerabilities. I've also utilized Pusher for real-time data handling and event broadcasting. In addition to web development, I have expertise in IT solutions, including system and network management using Kali Linux, Windows Server, and IIS, with a focus on preparing secure environments for development and production.

Skills

- | | | |
|---------------|-------------------------|-------------------|
| • HTML | • PHP | • kali Linux |
| • CSS | • Laravel | • Windows Server |
| • JS | • MySQL | • IIS |
| • Bootstrap 5 | • Migration | • IT Solution |
| • jQuery | • Restful Api | • Network |
| • Ajax | • WebSocket - Real Time | • Problem Solving |
| • Vue.js | • Project Management | • Teamwork |

Experience

Information Security | Al Mansour Bank

July 2024 – Present

- Monitored critical systems to ensure the security and integrity of the bank's information infrastructure.
- Proactively identified and addressed vulnerabilities, implementing strategies to mitigate risks and enhance system security.
- Conducted awareness campaigns to educate employees on best practices in information security, ensuring a culture of security across the organization.
- Managed and executed system updates, using update programs to ensure all devices were up to date and protected from potential threats.

Delivery Company Project | Hi-Express

- Worked on the back end of a delivery company project, focusing on preparing the API for the front-end.
- Utilized Laravel in collaboration with the Click Up platform to deliver seamless integration and functionality.
